Research Profile

Early-career computer science researcher and final-stage PhD candidate specialising in artificial intelligence, immersive technologies (XR/VR), and human-computer interaction (HCI), with active peer-reviewed publication record across journal and conference venues. Work includes the design and user-based evaluation of an AI-driven MetaHuman for immersive VR (first-author ACM conference paper) and a co-authored applied study using machine learning and deep learning to predict cardiovascular risk from large-scale health data. Combines applied AI and data-analysis capability with practical software development in Unity and Unreal Engine, supported by quantitative research training (systematic review, statistical analysis, survey design). Comfortable working within collaborative research teams, analysing data, developing and evaluating interactive digital tools, and disseminating findings through scientific writing and conference presentation.

Education

PhD, Computer Science

Oct 2024 – Jan 2028

Teesside University, Middlesbrough, UK

Research focus: Metahuman in Increasing immersive brand engagement using Virtual Reality environment. Expected completion within the next year.

MSc, Management Information Systems

Aug 2020 – Jan 2023

University of South-Eastern Norway, Norway

Information systems, organisational technology integration, and data-driven decision-making.

BSc (Hons), Business Information Systems

Jan 2017 – Jan 2020

Anglia Ruskin University, UK

Technical & Research Skills

- **AI & Machine Learning:** Supervised classification, ensemble methods (Random Forest, XGBoost, LightGBM), deep learning (ANN, CNN, RNN), model evaluation and hyperparameter tuning; generative AI tools.
- **Data & Statistics:** Data cleaning and exploratory analysis, predictive modelling, statistical reporting; SPSS, R, Python (NumPy, Pandas, Seaborn), data visualisation.
- **Research Methods:** Systematic literature review, qualitative and quantitative analysis, hypothesis testing, survey design.
- **XR / Immersive & HCI:** Unity, Unreal Engine (MetaHuman), immersive experience design; human-computer interaction (HCI) — interactive prototype development and user-based evaluation.
- **Programming & Web:** Vibe coding, Python, C#, PHP, HTML/CSS, MySQL.

- **Tools & Productivity:** Figma; Microsoft Office 365 (advanced); project planning and documentation.

Research & Professional Experience

Content Creator & Student Engagement Assistant

Jul 2025 – Present

Teesside University, Middlesbrough, UK

- Manage a digital content pipeline from brief to publication, applying generative AI tools for copy and image creation while maintaining brand consistency.
- Provide frontline support across library and student services, assisting students with self-service systems and signposting to university resources.

Creator Lab Fellow — Artificial Intelligence

Mar 2025 – Jul 2025

Teesside University, Middlesbrough, UK

- Conducted data analysis to evaluate the integration of AI into academic enhancement and educational design within the Future Facing Learning framework.
- Collaborated cross-institutionally, producing deliverables that informed AI adoption policy in higher education.

Social Media Intern — Content & Analytics

Feb 2024 – Sep 2024

Moresrooms AS, Oslo, Norway

- Extracted, cleaned, and analysed platform performance datasets (reach, CTR, engagement rate, follower growth), surfacing trend insights to drive content strategy.
- Produced visual assets in Figma and Canva using consistent design systems.

Business Development Manager

Apr 2021 – Dec 2023

CoffeeBean Web Solutions, Dhaka, Bangladesh

- Conducted quantitative market analysis (competitor benchmarking, SWOT, customer segmentation) to identify growth opportunities and improve strategic targeting.
- Led requirements gathering and solution scoping with stakeholders, producing functional specifications and wireframes that reduced revision cycles.

IT Coordinator

Mar 2019 – Feb 2021

Digi Jadoo Broadband Limited, Dhaka, Bangladesh

- Maintained integration of servers, email, and financial systems; managed the hardware and software lifecycle and performed data backup and recovery to ensure business continuity.
- Delivered staff training on hardware, software, and cloud-based services.

Certifications

- Meta Certified Marketing Analytics Foundation
- Introduction to Generative AI — Google
